## **SALTWATER POOLS AND CORROSION DISCLAIMER**

Leisure Pools, Inc does not warrant damage to extrusions or other metal components associated with combining salt systems and automatic pool cover.

Galvanic corrosion, from using saltwater chlorination systems, attacks the metal parts of a pool and automatic pool cover. A saltwater pool is like a giant low voltage battery that slowly eats away at all metals. Leisure Pools can minimize the corrosion process, but does not endorse the use of saltwater chlorinators with automatic pool cover systems.

Please refer to Cover Pools™ Limited and Lifetime Warranty (attached). Cover Pools™ has the most extensive 7 year warranty to protect you from the damaging effects of galvanic corrosion: full, one-time-only, replacement of main tube and drive components if they corrode away from salt. See CORR-RESIST™ document (attached).

Please read the attached, *Carefree, ClearWater LTD, Article: Saltwater Pools*. This article will educate you on the inherent risks associated with converting your pool to salt water.

*Homeowner has read the above and attached information regarding salt chlorination systems. I am aware that there is required maintenance for the salt system to operate properly, as well as ensuring all salt and chemical levels are balanced. I am also aware of the corrosive properties of salt, the potential damage/deterioration that may occur as a result of the use of salt in my pool, and that such damage/deterioration is not covered under Leisure Pools Warranty.*
