INTRODUCTION to Ready-Made Dream (2013)

Installation with prints on vinyl and found objects
From the exhibition, American Dreamscape

Ready-Made Dream is based on the continuing narrative of the American Dream as expressed in designs for the ideal home, and in particular, the post-WWII suburban, single-family home – and its miniature manifestation, the modern dollhouse. The artist’s childhood growing up in the 1960’s and 1970’s provides the autobiographical spark to the project, however it is through her exploration of mid 20th century material culture that she re-discovers this era in which consumer culture and the American Dream seemed to become one and the same.

The overall exhibition entitled American Dreamscape, rather than presenting itself as an abstract ideal like the American Dream, can be contemplated as an object – like a landscape of things. At its core, Ready-Made Dream is a contemporary updating of the vanitas painting tradition in which symbolic objects remind the viewer of the transitory nature of human life and the meaninglessness of pursuing worldly goods and pleasures. The choice of the word Dreamscape is significant because, like our dreams, the American Dream can feel real but is illusory. Further, it is in the domestic sphere - the home - where an individual can literally see and palpably experience the Dream becoming a tangible object through the pursuit of possessions and consumer goods – through objects of desire.

Based on mid-20th century home design, the main gallery installation of Ready-Made Dream is comprised of a series of room-sized, trompe l’oeil (literally “to fool the eye”) compositions that create a fictional-ideal and ultimately ephemeral house. With “walls” that rise 10 feet tall, “rooms” that stretch across expanses as long as 32 feet, and the depiction of a plethora of larger-than-life everyday objects, navigating the installation is something akin to shrinking oneself down (like Alice) in order to enter a make-believe world. The artist’s process begins with detailed gouache paintings of the architectural settings to which are added collage elements from magazines, advertising and out-of-date encyclopedias. The final images are digitally scaled up to billboard size and printed on vinyl, and stretched across the gallery walls using a system of grommets. At discrete intervals, 3D objects of the period such as an avocado wall-mounted telephone with extra long cord, Lincoln Logs, and a paint-by-number painting are interjected into the otherwise flat trompe l’oeil installation, which serves to momentarily rupture the illusion and bring the viewer back to concrete reality. Focusing on the avalanche of new consumer goods and the related marketing that together helped define post-war aspirations, Ready-Made Dream is designed to create a hyper-real, larger-than-life contemplative environment that is as unsettling as it is familiar.

Children’s toys often mirror the world of adults, and so it was that mid-century dollhouses were available in Colonial, Ranch House, and Split-Level styles complete with modernized kitchens, living rooms with picture windows, trend-conscious design elements, rec rooms, breezeways, pools and patios, garages and carports, and even bomb shelters. High-quality, colorful lithographic printing made it possible for playhouses to come to the young consumer ready-made with artwork on the walls, rugs on the floor, drapes and wallpaper installed, possessions on shelves, roasts in the oven, etc. These miniature pre-fab worlds, like their real-world suburban house counterparts, are artifacts of the American Dream – and as an object of child’s play, they provide a model-sized version of the Dream itself.
Here and There Room Divider¹: Just what is it that makes yesterday’s homes so similar, so appealing?²

1. The new shape of a lemon
2. The shape of processed cheese food
3. The shape of mayonnaise
4. The shape of ketchup
5. The shape of something valuable
6. The shape of something ideal

¹ The *Here and There Room Divider* openly recreates the look of mass-produced plastic dollhouse furniture manufactured by Louis Marx and Company. Marx furniture was cast in a single color, and featured details of everyday objects as if placed on surfaces in a real house. See authentic Marx room divider cast in gray plastic in this exhibition.

² Title is an allusion to the now iconic 1956 collage by British pop artist, Richard Hamilton, “Just what is it that makes today’s homes so different, so appealing?”

¹ An acknowledgment of the importance of Belgian artist, Rene Magritte and his 1928-29 oil on canvas painting, *La trahison des images* (English: Treachery of Images) that consists of a painted pipe under which the artist wrote “Ceci n’est pas une pipe” (English: This is not a pipe).

² Self-explanatory. Though, we can add this picture was taken in Harding, New Jersey where the family lived in a split-level house. Over the mantle is a black and white painting of Monterey, California, which was a favorite family painting since they had just recently relocated from California to New Jersey.

**Lincoln Logs**
Canister with diagrams and Lincoln Log architectural model
Sizes variable
The canister announces that Lincoln Logs are America’s National Toy. Lincoln Logs were invented in 1916 by John Lloyd Wright, son of Frank Lloyd Wright, the architect. The current distributor of the toy claims that it was originally named after the 16th President of the United States, Abraham Lincoln. According to the Lincoln Boyhood National Memorial in Indiana, which is two miles east of Gentryville, Indiana, Lincoln did indeed grow up in a log cabin built by his father. Collection of the artist.

Aspen Magazine

Volume 1, Issue 3, 1966

Designed by Andy Warhol and David Dalton

On loan from the Wyndham Robertson Library, Hollins University

A short-lived “magazine-in-a-box” published from 1965 to 1971. This box for this issue was based on the graphics of the Fab laundry detergent box, and some of the contents include; a flexi-disc by Peter Walker and John Cale of the Velvet Underground, a flipbook based on the film *Kiss* by Andy Warhol and Jack Smith’s film *Buzzards Over Bagdad*, an IBM advertising booklet designed especially for this issue, *The Plastic Exploding Inevitable* which was an underground newspaper from Warhol’s Factory, and 12 Paintings from the Powers Collection which reproduced artworks from the collection of Thomas Powers including works by Willem de Kooning, James Rosenquist, Jasper Johns, Bridget Riley, Andy Warhol. For each issue of Aspen Magazine there was a guest editor, and some of these included Quentin Fiore and Fluxus artist George Macuinas.
